Remarks

This recent remodel is a marriage of modern amenity and architectural detail. The focal point is a luxurious kitchen with custom cabinetry, oversized marble island, soapstone counters, and Farmers sink. The open concept has formal and informal dining spaces separated by pocket doors, living room complete with gas fireplace, and a vaulted sunroom with heated floors and slider to the patio and landscaped yard. The first floor includes a spacious mudroom, renovated half bath, and office with built ins. An addition over the kitchen has afforded a master suite with vaulted ceilings, his and hers closets, and generous master bath with custom cabinets, marble counters, and heated floors. The former master includes en suite bath as well as two additional bedrooms and family bath. The finished basement with full bath makes for a great playroom or rec room. Updates like siding, electrical, windows, roof, HVAC, insulation and more, even the most discerning of buyers is sure to be impressed.
